

NEW PRODUCT RELEASE

Flowmaster proudly introduces our new 817553 American Thunder Cat-back exhaust, engineered specifically for the 2012 Boss 302 Mustang. A full 3.00" diameter throughout, this all-409S stainless steel true Cat-back system features our patented Scavenger X pipe, and incorporates flanges to retain the OE side-exit pipes. The custom-engineered 60 Series Delta Flow mufflers deliver an aggressive, powerful exterior sound and a moderate interior tone with very little resonance. The 4.00" diameter polished tips provide the finishing touch to the back of the car. The bolt-on exhaust comes with all necessary installation hardware and even includes side-pipe spacer plates with larger .75" holes- a popular modification in itself. The system provides a substantial performance gain, and with the detailed instructions is easily installed at home or by a professional. Like all Flowmaster stainless steel systems, our Limited Lifetime Warranty means you'll never need to buy another exhaust for your Boss. Please call 1-800-544-4761 or visit www.flowmastermufflers.com for more information.

- Power improvement that you can feel.
- Includes optional larger sidepipe plates.
- 409S stainless steel for maximum durability.
- Patented Scavenger X-pipe for mid range torque improvement.
