

NEW PRODUCT RELEASE

For Toyota Tacoma owners looking for a performance exhaust with a subtle look, Flowmaster introduces part number 817519, for 2000-2004 Xtra Cab and Double Cab models equipped with both the 3.4 liter V6 and 2.7 liter 4-cylinder engines. Featuring all-409S stainless steel construction, as well as a system-specific Super 50 Series muffler, this 50-state emissions legal exhaust bolts directly to the vehicle with a 2.50" inlet pipe and a full 3.00" single tailpipe, which exits behind the right rear tire. Along with a moderate exterior and interior sound, this US-made system provides the performance and mileage gains you expect from Flowmaster, while the appearance is enhanced by a 3.50" polished, Flowmaster-embossed stainless tip. For long term quality assurance, this exhaust is protected by our Limited Lifetime Warranty.

Please call 1-800-544-4761 or visit www.flowmastermufflers.com for more information.
