

**NEW PRODUCT RELEASE**

Owners of the GM Hummer H3 now have the final word in exhaust available to them. Flowmaster introduces our part number 817526, which is an all 409S stainless steel Cat-back system engineered for the 2006-2010 H3 equipped with both the 3.5 liter and 3.7 liter engines. As a 50-state emissions legal system, this Force II exhaust bolts directly to the flange behind the catalytic converter with a 3.00" inlet pipe and exits out the rear with two 2.50" mandrel-bent tailpipes. Featuring our Super 50 Series muffler, the system offers a mild interior tone and a moderate exterior rumble, along with the performance and mileage gains Flowmaster is known for. Brushed stainless turn-down tips complete the look of the exhaust and detailed step-by-step instructions allow for easy at-home or professional installation. The system is covered by our Limited Lifetime Warranty for long term quality assurance.

Please call 1-800-544-4761 or visit [www.flowmastermufflers.com](http://www.flowmastermufflers.com) for more information.
