

DESCRIPTION

Owners of the 2003-2007 Ford Super Duty F250 and F350 trucks equipped with the 6.0L Powerstroke engine and automatic transmission have a new choice in performance exhaust. Flowmaster proudly introduces our new all-stainless turbo-back system, part number 817546. Engineered for all wheel-bases, this Force II system features heavy-gauge 409S Stainless Steel construction, and uses our patented Laminar Flow Pro Series muffler for a mild/moderate sound both inside and out. With its full 4.00" mandrel-bent pipe, this bolt-on system attaches to the turbo housing with an OE-style connection, and exits the truck behind the right rear tire with a 5.00" diameter polished, Flowmaster-embossed stainless tip. Included with the system are detailed instructions, as well as all necessary hardware, allowing for an easy installation at home, or by a professional. A Lifetime Limited Warranty provides long term quality assurance. Please call 800-544-4761 or visit www.flowmastermufflers.com for more information.

- **Stainless Steel Construction**
- **Mild Interior Sound Level**
- **Patented Laminar Flow Technology**
- **Lifetime Limited Warranty**
