

## DESCRIPTION

Flowmaster proudly introduces our all new 409S stainless steel Cat-back exhaust for the 2007-2012 Toyota FJ Cruiser. This Force II system, part number 817433, bolts on directly behind the OE emissions equipment and features 2.50" mandrel-bent tubing throughout for maximum performance and efficiency. Our popular Super 50 Series muffler provides a mild to moderate sound level inside and out that is perfect for daily driven applications. A fully polished, Flowmaster-embossed stainless tip exits behind the right rear tire providing a finished look to the system. With detailed step-by-step instructions and all necessary hardware, installation is easy for the at-home or professional technician. Like all Flowmaster stainless exhaust systems, the 817433 is protected by our Lifetime Limited Warranty for long term quality assurance. Please call 1-800-544-4761 or visit [www.flowmastermufflers.com](http://www.flowmastermufflers.com) for more information.
