

DESCRIPTION

As one of the most noticeable trucks on the road, Ford's 6.2L SVT Raptor doesn't need much help standing out in a crowd. For the 2010-2012 Raptor (and other 6.2L F-150 models in Extra/Crew cab, 5.5' bed configurations), Flowmaster proudly introduces a direct bolt-on 50-state emissions legal Cat-back exhaust system. Part number 817551 provides a subtle performance look to the truck, but delivers all the real world performance gains you expect from a Flowmaster-engineered system.

This 409S stainless steel American Thunder exhaust features a custom-tuned 50 Series HD muffler for an aggressive performance tone outside and a moderate interior sound, with a single 3.50" mandrel-bent tailpipe exiting in the factory location. A fully polished 4.00" diameter stainless tip provides a finished look. With the included detailed instructions and all necessary hardware, the 817551 is easily installed at home or by a professional, and our Lifetime Limited Warranty assures that this will be the last exhaust you'll need to buy for your Raptor. Please call 1-800-544-4761 or visit www.flowmastermufflers.com for more information.
