

DESCRIPTION

Flowmaster introduces our new stainless, ceramic coated, full-length headers for owners of 1968-1974 Chevrolet A-Body muscle cars equipped with Big Block engines, including the Chevelle, Malibu and El Camino. Featuring a warp-resistant 3/8" flange and our popular ball-flange collectors for a gasket-free seal, our part number 814114 Scavenger Series® Elite headers are engineered for maximum performance and durability. Large 2" primaries and 3-1/2" collectors deliver excellent performance for modified engines, and careful engineering provides a great fit in the car. Please see below for fitment information and notes.

With detailed instructions and included hardware and gaskets, installation is easily accomplished at home and the included ball-flange reducers make matching to our 2.50" or 3.00" exhaust systems a simple task. To assure customers of a quality product, the headers are covered by our 1-year warranty. Please call 707-544-4761 or visit www.flowmastermufflers.com for more information.

- **Stainless Steel Construction**
- **Ball & Socket Collector Connections**
- **Dyno Tuned For Maximum Performance**
- **High Temperature Ceramic Coated**
- **3/8" Thick Laser Cut Flanges**
