

DESCRIPTION

Jeep Wrangler owners now have a clear performance exhaust solution for their 4 and 6 cylinder vehicles. Flowmaster proudly introduces our new 409S stainless steel Cat-back exhaust system for 1997-1999 Wranglers equipped with the 2.5L and 4.0L engines. Featuring a 2.50" mandrel-bent pipe, this 50-state emissions legal system bolts directly behind the OE converter and uses our 60 Series Delta Flow muffler for a deep performance sound outside with a mild interior sound, as well as the performance gains you expect from Flowmaster. Extensive fitment testing on many Jeeps means this system will work with the optional factory trailer hitch, as well as many popular aftermarket hitches, and installation is made easy with the included illustrated instructions. As with all Flowmaster stainless systems, our Lifetime Limited Warranty provides assurance of quality. Please call 1-707-544-4761 or visit www.flowmastermufflers.com for more information.

- **Stainless Steel Construction**
- **Dyno Tuned For Maximum Performance**
