

DESCRIPTION

Flowmaster's popular Outlaw race mufflers are a great solution for race classes requiring mufflers but having no set sound reduction rules. We are proud to introduce two new additions to this popular line-up. Part numbers 815425 (4.5" diameter x 11" case) and 815425S (4.5" diameter x 6.0" case) are the new 409S stainless steel 2.50" inlet/outlet Outlaws, developed for smaller displacement race engines running 2.50" exhaust. Designed to mount directly to the header collector, Outlaw mufflers can also be used in full exhaust systems when minimal sound reduction is needed. Please call 707-544-4761 for specific recommendations for the Outlaw Series mufflers, or visit www.flowmastermufflers.com for general information.

- **Stainless Steel Construction**
- **Aggressive Performance Tone**
- **Maximizes Exhaust Scavenging**
