

DESCRIPTION

The all new Scion FR-S and Subaru BRZ are two of the most exciting new cars available for 2013, with their aggressive styling, rear-wheel drive and sporty flavor. Developed by Subaru, the 2.0 liter boxer engine delivers 200 HP, but sounds like half that. Flowmaster has the answer to make the car sound like it performs, with our part number 817596 T409 stainless steel Cat-back exhaust system. Featuring a direct bolt-on 2.50" pipe from the cat to the 80 Series muffler, the system provides dual 2.50" tailpipes that end with double wall 4.00" polished stainless tips in the factory cutouts. As an American Thunder system, the 817596 delivers a deep, aggressive performance tone outside with a moderate interior sound that most any enthusiast will enjoy, along with the performance gains you demand from Flowmaster. With all necessary hardware included, this American made exhaust is a true bolt-on with no welding required. Illustrated instructions make the job easy, and a Lifetime Limited Warranty means this will be the last exhaust your FR-S or BRZ will ever need. Please call 707-544-4761 or visit www.flowmastermufflers.com for more information and product videos.
