

DESCRIPTION

For owners of 1970-1974 Dodge Challengers and Plymouth Barracudas, Flowmaster is proud to introduce our all new, all stainless Header-back exhaust system, part number 817355. A full 2.50" dual exhaust, this American Thunder system is designed for cars using full-length headers and extends forward to the transmission crossmember. From there, the system features our patented Scavenger X-pipe system and our legendary Super 40 Series mufflers. Mandrel-bent 2.50" tailpipes curve over the axle to exit under the rear valance panel. With a moderate to aggressive sound, depending on engine specs, this system delivers the performance benefits you demand from Flowmaster. The included hardware and illustrated instructions make installation an easy job, and the Lifetime Limited Warranty means this will be the last exhaust your Mopar will ever need. Please call 707-544-4761 or visit www.flowmastermufflers.com for more information and product videos.
