## 7-Quart LS Circle Track Oil Pan

Milodon now offers several LS engine oil pans and their latest is designed specifically for circle track racing. The new pan features a shallow construction that is only 5.25" deep and allowing for great ground clearance. Thanks to a passenger side kick out, there is plenty of area to carry an ample seven quarts of oil.

The new low profile pan is built for cars running DMP and open show modified classes. There is an optional windage tray available to close off the sump area preventing oil splash back and recovers oil quickly.

All Milodon pans are TIG welded for incredible strength and each pan is leak checked and fit to a block to confirm perfect mounting alignment. And of course, the trademark MIL-spec gold coating is applied to aid in rust prevention. Over 50 years of performance experience are built into each Milodon pan.

Low LS Pan with Kickout – PN 31527

Optional Windage Tray – PN 32150
