

DESCRIPTION

Flowmaster's new 60 Series Delta Force race muffler is ideal for those race classes where maximum performance is needed with maximum sound control. Manufactured entirely in the US, the 409S stainless steel 60 Series muffler features two complete Power Chambers and can lower sound from open exhaust by as much as 15db in many race applications. The 60 Series, while developed for various Circle Track applications, can be used in many other race classes where significant sound control is needed. Dimensions for the 60 Series are 5.00" depth, 12.00" width and 22.00" case length (28.00" overall length).

Additional information can be found at www.flowmastermufflers.com, but racers should contact Flowmaster at 707-544-4761 for specific application information.

- **Stainless Steel Material**
- **Superior Sound Reduction**
- **Mig Welded Construction**
