

DESCRIPTION

The 1996-1998 Chevy Cavalier and Pontiac Sunfire have become very popular cars to modify, and Flowmaster now offers the ultimate choice in exhaust for the Coupe and Sedan models equipped with both the 2.2L and 2.4L engines. This American Thunder exhaust system bolts on directly behind the factory catalytic converter for 50-state emissions legality and features mandrel bent 2.25" 409S stainless steel piping throughout with a stainless steel 60 Series Delta Flow muffler for a noticeable performance growl outside, and a milder interior tone- perfect for a daily driven car. The system is capped with a fully polished, embossed stainless tip for a look to match the sound, and included instructions make at-home installation an easy project.

This US-manufactured system is protected by Flowmaster's Lifetime Limited Warranty for long term peace of mind.

Please call 707-544-4761 or visit www.flowmastermufflers.com for more information and product images and video.
