

It's here; the latest Ridetech catalog is now in print and ready to ship. It's jam-packed with every air suspension option we have to offer and features hundreds of updates and new product lines. [Make sure to request a **free** catalog by mail or download it by clicking here.](#)

New!

- **Smoothbody shocks!** This one has been a while coming but now we can offer EVERYONE something for their hotrods. The 1.5" monotube body has been designed to directly replace your worn out or inadequate shocks with a high tech performance unit that offers a dramatic improvement in ride quality and handling. [See more.](#)
- **STRUTS!** This has been a long time coming too, but we now have a beautiful monotube strut that is a direct bolt-in upgrade for late model Mustangs and Camaros. [See more.](#)

...and the **changes:**

- The new smoothbody shocks are such a significant upgrade that we are incorporating them into ALL of our CoolRide air suspension shock kits.
- AMK Compressors now come standard in every 5 gallon air control system
- The NA, SA, and TA shock valving designations have been replaced with:
 - **RQ = Ride Quality** – non-adjustable valving that is tuned for ride quality
 - **HQ = Handling quality** – rebound adjustable valving that can be tuned for ride quality AND handling quality
 - **TQ = Track Quality** - our Triple Adjustable shocks that are the finest suspension tuning tool that you can buy.
