Powermaster Performance Presents Starter for Ford 5.0 Coyote

West Chicago, IL

Powermaster Performance of West Chicago, Illinois is proud to offer a light weight, high performance starter for the Ford, 5.0 Coyote series engine in the 200 ft lb XS Torque part number 9532. With cranking power for engines with up to 18:1 compression in an 8 pound package, the XS Torque starter has the greatest torque to weight ratio of any starter in the performance market.

Using a 1.4kw starter motor, and 4.4:1 gear reduction, the XS Torque 9532 resists heat soak with its' fully encapsulated aluminum solenoid.

Designed, engineered, and manufactured in the USA, each Powermaster Performance product is tested for reliability and durability prior to shipping.

For more information on this small wonder, contact Powermaster Performance at 630-957-4019 or tech@powermasterperformance.com
