

DESCRIPTION

For those folks with newer GM Duramax diesel trucks, the search for an aftermarket exhaust just got easier. Flowmaster announces our new DPF-back bolt-on exhaust for the 2011-2013 6.6L Duramax trucks, part number 817620. Featuring all 409S stainless steel construction, this mild-toned Force II system is a full 4.00" diameter mandrel bent pipe system that bolts directly behind the DPF and like the OE exhaust, eliminates the muffler. Exiting behind the right rear tire, the system provides a full 5.00" polished, embossed stainless tip for a great performance look.

The 817620 system is made in the USA and includes our Lifetime Limited Warranty as well as all the necessary hardware for an easy at-home installation. Please call 707-544-4761 or visit www.flowmastermufflers.com for more information and product images and video.
