

DESCRIPTION

For those folks with newer Dodge and Ram Cummins diesel-equipped trucks, the search for an aftermarket exhaust just got easier. Flowmaster announces our new DPF-back bolt-on exhaust for the 2007-2012 6.7L Cummins trucks, part number 817621. Featuring all 409S stainless steel construction, this Force II system features our Outlaw Series muffler for a mild performance tone. The system uses a full 4.00" diameter mandrel bent pipe system and bolts directly behind the DPF for 50 state emissions legality. Exiting behind the right rear tire, the system provides a full 5.00" polished, embossed stainless tip for a great performance look.

The 817621 system is made in the USA and includes our Lifetime Limited Warranty as well as all the necessary hardware for an easy at-home installation. Please call 707-544-4761 or visit www.flowmastermufflers.com for more information and product images and video.
