

BAER

FOR IMMEDIATE RELEASE:

Baer Brake Systems, Phoenix, AZ is proud to announce their system for the FR-S Scion. Baer brings sexy to an already superb vehicle.

This system compliments the look of the Scion with it's 6P Pro+ caliper which is mounted on a 14 inch 2-pc directionally vaned, slotted, drilled and zinc plated rotor. The 6P Pro+ is a 6 piston caliper which contains stainless steel pistons, abutments and noise suppression springs. This caliper has staggered piston sizes to minimize pad wear, thus saving you money in your pocket!

The rear SS4+ caliper is mounted on a 13 inch 2 pc directionally vaned, slotted, drilled and zinc plated rotor. Rear 13" will allow use of factory park brake components.

Standard colors are Red, Black and Silver powder coat, but custom colors are available to complete your look, for an extra charge. Front systems start at \$1995 and rears start at \$1395.

This system is perfect for the enthusiast looking to fill his wheel with a nice modern, big brake!
