

DESCRIPTION

Cadillac's exciting new 2013 Escalade, with its 403 HP 6.2L engine, is a very fast, luxurious SUV. For some, however, the whisper quiet factory exhaust simply doesn't measure up. For models equipped with factory dual tailpipes, Flowmaster has the answer with our new stainless steel Force II Cat-back exhaust system, number 817622. Bolting on directly behind the factory converters, this system features a 3.50" inlet pipe going into a Pro Series muffler. A 3.50" pipe then exits over the rear axle and splits into two 3.00" pipes, each containing a custom-tuned resonator. The exhaust exits through the factory bezels for a subtle look. Delivering the performance gains you demand from Flowmaster, this Force II system provides a deep performance tone outside with a mild interior sound, in fitting with the luxury image of the Escalade. Manufactured in the USA, this exhaust system is easily installed at home or by a professional, and is backed by our Lifetime Limited Warranty for a lifetime of quality assurance. Please call 707-544-4761 or visit www.flowmastermufflers.com for more information and product videos.
