

DESCRIPTION

The Fiat 500, one of the most popular subcompacts currently available, is a fun, sporty car with a long heritage. With great looks and handling, one ingredient missing from the overall package is the right sound. Flowmaster is happy to provide just the right tone for the 2012-2013 1.4L (non-turbo) 500 with our new all-stainless Force II Cat-back exhaust, number 817623. Bolting on directly behind the OE cat for 50-state emissions legality, the system features a single 2.00" pipe with our Laminar Flow dBX muffler, followed by a 2.00" tail-pipe. A highly polished oval tip provides a great performance look to the back of the car. As a Force II this system delivers a sporty performance tone outside with a moderate interior sound that will please sports car enthusiasts, along with the performance gains you expect from Flowmaster products. Manufactured in the USA, this bolt-on exhaust is backed by our Lifetime Limited Warranty, and it includes detailed instructions and all necessary hardware. Please call 707-544-4761 or visit www.flowmastermufflers.com for more information and product videos.
