Jiffy-tite has been the preferred manufacturer of fluid connectors for the industrial and original equipment manufacturer sector of the automotive industry since 1963. Their customer list includes names like Chrysler, General Motors, Ford, Caterpillar, Mercedes Benz, Harley Davidson and more. Jiffy-tite's state-of-the-art technology provides far better seal integrity than any other product on the market, which is why they meet the OE's stringent quality requirements. Unlike threaded fittings, which always present a risk for fluid leaks or hot spills, Jiffy-tite's unique design provides a leak proof seal. Even when disconnected, Jiffy-tite's Motorsports fittings prevent fluid loss.

For those looking for the same leak-free, quick-connect characteristics in a swivel elbow, Jiffy-tite offers female AN swivel elbows that allow for proper alignment in the exact location needed. Simply attach the elbow to the male thread and adjust the swivel elbow to where you want it, and tighten nut. They are available in size -4 to -12, in 45 and 90 and in both plug and socket.

Jiffy-tite Motorsports makes a full line of Quick-Connect Fluid Fittings available for virtually any fuel, water, engine or transmission oil system on the market today.

For more information about the easy to use 2000, 3000 & 5000 series Jiffy-tite Quick-Connect Fluid Fittings, or any of their Quick Connect systems, please call Duane LaFleur at Jiffy-tite Motorsports: 1-888-605-7788, or visit [www.jiffy-tite.com](http://www.jiffy-tite.com). [Visit their website](#)
