**LINGENFELTER OFFERS 5TH GEN CAMARO
INTERCOOLER RADIATOR AND FAN KIT**

DECATUR, Ind. – Lingenfelter Performance Engineering (LPE) offers a high capacity intercooler radiator and fan kit for the Camaro ZL1 as well as supercharged and turbocharged Camaro SS applications.

Designed to work with stock and higher output intercooler pumps, Lingenfelter's 5th Gen Camaro intercooler radiator and fan kit (part # L320042012) features a unique front-to-back double pass design that maximizes the fluid cooling. It includes temperature-controlled, two-speed fans that run only when needed for quieter operation and increased durability.

Additional benefits include increased fluid capacity; reduced intercooler fluid temperatures and post intercooler air temperatures; increased power; improved airflow to the engine radiator; and improved engine cooling.

The Lingenfelter 5th Gen Camaro intercooler radiator and fan kit features an optional manual fan and pump override with automatic off timer. It retails for \$995.

For more than 34 years, Lingenfelter Performance Engineering has created a matchless heritage of bringing astounding new capabilities to the world's most sought-after sports cars. This legendary record of precision engineering continues today, as the highly skilled Lingenfelter production team continues to target design excellence in engine packages, superchargers and high-performance aftermarket components that refine power, speed and control. For more information, visit www.lingenfelter.com, contact Lingenfelter Performance Engineering at 1557 Winchester Road, Decatur, IN 46733, or call 260.724.2552.
