Billet Aluminum Hood Latch assembly for Chevrolet Muscle Cars

Eddie Motorsports leaves no stone unturned when it comes to dressing up your car's engine compartment. Eddie's latest piece of custom hardware is their billet Hood Latch assemblies for Chevy muscle cars. Machined from solid chunks of 6061T6 aluminum and 304 stainless steel in their Southern California facility, the Eddie Motorsports Hood Latch assembly is a direct replacement for your cheap stock stamped steel pieces. The hood latch kit comes complete with a billet aluminum base plate, and stainless steel pilot bolt, pop-up spring, and retaining cup. Stainless steel fasteners and billet aluminum finishing washers are also included.

The Eddie Motorsports hood latch assembly can be purchased with a raw machined or highly polished finish as well as a variety of Fusioncoated colors. They are currently available for 67-81 Camaros, 68-72 Chevelles, 70-72 Monte Carlos, and 63-67 Novas.

Prices for the hood latch assembly begin at just \$120.
