

FOR IMMEDIATE RELEASE:

NEW Expanded IronSport Applications!!

Baer Brake Systems, Phoenix, AZ., is proud to expand their offerings for the very popular IronSport line of brake products! The Ironsport is an affordable rear brake conversion, and with some recent bracket changes now fits all 10/12 bolt Bearing on Axle applications (for the Buick, Olds, Pontiac enthusiasts), as well as the GM G-body from 1978-1988. *This new bracket design will also fit with many bolt on c-clip eliminator kits!*

The IronSport features a single piston cast iron calipers mounted to 11.625" slotted, drilled and zinc plated rotors. This conversion will include all the parts needed for a drum to disc conversion other than park brake cables (the caliper does have a built in park brake).
