Billet Aluminum Hood Pins

There's nothing more frightening or potentially more damaging than a hood that's blown loose on your classic car at high speeds. Eddie Motorsports new billet aluminum hood pins will insure that this never happens to your car. The complete custom hood pin assemblies are CNC machined from billet 6061-T6 aluminum and like all products produced by Eddie Motorsports, they are American made to the strictest manufacturing standards. The hood pins are available in three styles, a smooth finish with blind or through-hole mounting and Eddie's new Diamond series. The pins can be ordered with a variety of finishes including machined or brilliant polished finish, black or clear anodized. They are held to the hood with four fasteners and come with a billet adjuster nut and stud, flip over pin with integral tether, gasket, and stainless steel fasteners.

Whether you are looking for the ultimate in customizing or just want the security of knowing your hood will stay in place at high speeds, Eddie Motorsports hood pins are the answer. These quality pieces start at just \$90.00 a set.
