FRONT RUNNER STEEL WHEELS FOR YOUR VINTAGE MOPAR

Wheel Vintiques Offers its Mopar Standard Wheels in New 15x4-inch Sizing

Fresno, CA – Mopar has a huge following, especially when it comes to the high performance muscle cars of the '60s and '70s. With that in mind, Wheel Vintiques is a leading supplier of high-quality reproduction wheels for Mopar applications, and recently introduced a brand new product for Mopar enthusiasts. It's a new take on a tried and true wheel design, and it's sure to gain attention from nostalgia drag racers.

The new product is a Mopar Standard steel wheel, with all new 15x4-inch sizing, to be used on the front of street machines, drag cars and sleepers. The center is the same as other Mopar Standard wheels, but it's built with a 15x4-inch rim, which offers great weight reduction and reduced rolling resistance for performance-minded Mopars. Wheel Vintiques offers the same wheel in other sizes, such as 15x6, 15x7, 15x8 and 15x10, so it's easy to mix and match to get the right look. All wheels in the Mopar Standard product line are available in 5x4- and 5x4.5-inch bolt patterns.

Regarding the new Mopar Standard front-runner, it is available in a powder coated satin black finish, which is the perfect choice for a sinister looking drag car or sleeper build. Wheel Vintiques also offers center caps for its Standard wheels, including the OE Cap (also known as the Poverty cap), and a plain moon-style cap. You can also get valve stems, lug nuts and trim rings, depending on your project.

From a quality standpoint, Wheel Vintiques products are second to none. Precision tooling makes for clean lines when the center sections are stamped, and increased quality control ensures you get a perfectly true wheel. A massive inventory of wheels makes for quick order turnaround and delivery to your door, making Wheel Vintiques a leader in the steel wheel industry. All Wheel Vintiques wheels are made right here in the USA, and the new Mopar Standard front-runners are in stock and ready to ship.

If you need a set of wheels for your muscle car or simply want additional information regarding the enormous product line, contact Wheel Vintiques at 559-251-6957 or visit the website at www.wheelvintiques.com.
