For Immediate Release

Plug and Play Transmission Harnesses for Fox Body Mustangs from Ron Francis Wiring

There is no doubt that the Fox Body Mustang has become one of the most modified cars in history. The 5.0 is highly sought after by hot rodders everywhere. As enthusiasts themselves, Ron Francis Wiring appreciates the need for reliable, easy to install wiring. It is with these features in mind they created their newest addition to their extensive product offering with their 1987 – 1993 Fox Body Mustang transmission harnesses.

These harnesses are offered for both automatic and manual transmissions. They are manufactured with factory correct connectors and terminals, quality crosslink automotive grade wire and a high temperature protective covering. It connects the main vehicle harness to the transmission with easy, trouble-free installation. For full replacement, the short harnesses at the transmission are available separately.

For additional information please visit www.ronfrancis.com or call 610-485-1981.
