**For Immediate Release**

### **Granatelli Ford Mass Airflow Sensors**

**Oxnard, CA — January 7, 2013** - Granatelli Motor Sports is the original high performance MAF manufacturer and has applications for virtually all 1988-2012 Ford cars, trucks, and SUVs. The Granatelli MAF sensor is unique because it is the FIRST MAF sensor to achieve 50-state legal C.A.R.B. certification. And, it's the ONLY MAF sensor calibrated on a proprietary MAF dyno for spot on calibration (stock or modified). Now for the

best part: the Granatelli MAF flows 47% more air, adds 10 to 35 hp to the rear wheels, and won't void your factory warranty. Installation is snap requiring only a few minutes of your time and basic tools. If you're running an aftermarket cold air intake or ram air, you need to order the cold air tuning model (designated by a -C after the part number). The original IS still THE BEST. Insist on Granatelli MAF sensors for your Ford car, truck or SUV.

Granatelli Ford Mass Airflow Sensors are available wherever Granatelli Motor Sports products are sold. For more information, please call 1-805-486-6644 or visit [www.GranatelliMotorSports.com](http://www.GranatelliMotorSports.com).
