

Introducing **NEW** Air Cleaners from MSD

You rely on MSD to fuel your engine with Atomic fuel control or to provide the fire with multiple sparks to produce the performance you expect. Now you can ensure your engine's getting the cleanest air possible with these new air filter kits.

MSD offers two NEW chrome air cleaner assemblies: one for Atomic TBI users and another for MSD fans. Both designs are based on 14-inch diameter, 3-inch tall filters and display the respective Atomic and MSD logos embossed to the show quality chrome cover.

Hood clearance will be no issue as the base features a 3/4-inch drop base that fits a common 5 1/8-inch air horn. MSD even supplies a mounting stud and extra nice wing nut so you have everything you'll need to finish off your MSD or Atomic equipped installation.

**Air Cleaner Assembly with MSD
logo PN 2890**

**Air Cleaner Assembly with
MSD/Atomic Logo PN 2895**

Features:

- Chrome cover features the MSD or Atomic EFI logo
- Available with a 3-inch tall high flow, washable element or paper filter
- Recessed 3/4-inch drop base clears most throttle linkages and distributors
- Top of the chrome cover sits only 3.5-inches from the throttle body

Available:

Air Cleaner Assembly, Atomic/MSD logo - PN 2895

Air Cleaner Assembly, MSD logo only - PN 2890

Element, Paper Replacement - PN 2893

Element, Washable High Performance Element - PN 2894
