

Tomar™ TD44 Clutches

Lake Zurich, IL – Tomar™ TD44 Clutches are designed to provide cool running temperatures in high-horsepower kart, junior dragster and mini-bike applications.

Available in two-, three- or four-disc configurations for ¾" and one-inch crankshafts, Tomar™ TD44 Clutches can hold up to 60 horsepower and are designed for Animal, Modified, Clone, Stock, Flathead and Jackshaft applications competing on dirt or asphalt, as well as for Jr. Dragsters and Mini Bikes. The clutches use Thermal Dissipation (TD) technology, allowing them to run cooler at higher stall speeds that typically damage other inferior clutches. This patented design ensures that friction surfaces are isolated to the disc and rotor, thus eliminating warping and resulting in fade-free performance. Tomar™ TD44 Clutches are designed with 9 to 25 teeth in the clutch assembly.

#466314

Quick Facts

Product: Tomar™ TD44 Clutches
Part Number: Application Specific
Street Price: Call For Pricing

Social Media Pitch: Tomar™ TD44 Clutches use patented TD technology to run cool at high stall speeds in higher HP, Kart, Jr. Dragster & Mini-Bike applications

Features & Benefits:

- Available in 2, 3- or 4-disc configurations for ¾" and 1" cranks; hold up to 60 HP for a variety of powersports applications
- Patented TD technology allows clutches to run cooler at higher stall speeds
TD technology isolates friction surfaces, eliminating warping & resulting in fade-free performance

About Tomar™

Tomar™ Racing Clutches by Quarter Master® is the most trusted name in 2- and 4-cycle, wet and dry design kart clutches, as well as motocross racing wet design clutches. Tomar™ has built its reputation on superior products backed by personalized, one-on-one service and technical support offered directly to racers. Today, Tomar™ and Quarter Master® have a shared mission to be industry leaders with products that provide racers with what they need most – exceptional on-track performance.
