Quarter Master® Aluminum Driveshafts, Yokes & U-Joints

Lake Zurich, IL – Lightweight aluminum driveshafts, yokes and u-joints from Quarter Master® work together to provide smooth driving characteristics free of frustrating, performance-robbing vibrations.

All driveshafts from Quarter Master® offer the maximum in weight reduction and decreased moment of inertia, in addition to high strength and durability. The company's revolutionary aluminum driveshafts are built with a two-part, weld-free assembly process that eliminates the distortion and loss of heat-treat strength caused by welding. Hardcoat-anodized, forged aluminum end yokes are interference fit to O.D. ground 3.0" x .120" aerospace aluminum tube. Heavy-duty racing u-joints and a quality slip yoke are then installed. Finally, the entire assembly is computer balanced. These driveshafts weigh 40 percent less than their steel counterparts, and all of the component pieces work together to provide smooth, vibration-free performance.

Slip yokes and u-joints are also available for individual purchase. Quarter Master® Slip Yokes fit most popular domestic applications in a variety of u-joint sizes. They are also available in extended length and heat-treated versions. Meanwhile Quarter Master® also carries a variety of high performance and Ultra-Duty™ U-Joints specifically designed tough enough to stand up to today's demanding racing applications.

Quick Facts

Product: Quarter Master® Aluminum Driveshafts, Yokes & U-Joints

Part Number: Application Specific

Street Price: Call For Pricing

Social Media Pitch: Quarter Master® aluminum driveshafts, yokes & u-joints work to provide smooth, vibration-free performance while maintaining durability

Features & Benefits:

- Aluminum driveshafts are built w/ a weld-free process to eliminate distortion & loss of heat-treat strength
- Driveshafts feature 40% less weight than steel counterparts; all components are computer balanced & work together for smooth vibration-free performance
- Durable slip yokes & u-joints also available for individual purchase to fit a wide variety of applications

About Quarter Master®

Quarter Master® began operations in 1958, and since that date, Quarter Master® products have enjoyed a history of track-proven results. Quarter Master® products are built to exceed racers' demands for reliability, high-performance and durability. Our passion and our commitment are to the racer's ultimate goal...winning! Quarter Master® joined the COMP Performance Group™ in early 2009 to become part of the largest family of automotive aftermarket performance manufacturers.
