MICKEY THOMPSON PERFORMANCE TIRES & WHEELS INTRODUCES M/T METAL SERIES BUMPERS FOR JEEP JK

STOW, OH – Oct. 29, 2013 – Made in the U.S., the new M/T Metal Series bumpers from Mickey Thompson offer a durable, lightweight, modular construction in a classic black, two-stage powder coat finish.

The front bumper, available in three different end-cap options – flush-end, stubby and full-length – includes welded ¾-inch D-ring mounts along with an optional Winch plate that accepts most winches including the Warn® Zeon. The stubby and full-length options offer integrated rock light ports, and all are available in choice of low or “stinger” style guard options. Configurations can be selected based on personal style.

The rear bumper includes optional rock light ports, welded ¾-inch D-ring mounts, and is available with an optional tire carrier that swings out with the tailgate for easy, one-handed operation. All the new Mickey Metal Series bumpers include heavy-duty frame attachment points for rock-solid installation and reliability.

“The new M/T Metal Series bumpers for Jeep JK are ready for off-road action,” said Ken Warner, VP of Marketing, Mickey Thompson. “The modular construction delivers a great combination of style and durability. The configuration is easy to personalize making them tough, functional and great looking.”

The new M/T Metal Series bumpers are scheduled for availability for Jeep JK model years 2007 and newer beginning the second quarter of 2014.
