Quarter Master® 10.4" Street Stock Clutches

Lake Zurich, IL – New 10.4" Street Stock Clutches from Quarter Master® are built for circle track applications that require stock-type components.

Quarter Master® 10.4" Street Stock Clutch and flywheel packages were developed for racing classes where competitors must run a stock-type, single-disc clutch. These clutches' cutting-edge features translate into the lowest possible moment of inertia (MOI) and deliver a performance increase that can be felt on the track. The clutches feature a steel-faced aluminum or modular iron pressure plate that provides strength and durability, while lightweight steel flywheels create a noticeable weight reduction that translates into improved performance. The clutches are available with organic or heavy-duty friction discs and solid or sprung hubs. Quarter Master® 10.4" Street Stock Clutches are a perfect option for Street Stock applications competing on dirt or asphalt.

Quick Facts

Product: Quarter Master 10.4" Street Stock Clutches
Part Number: Application Specific
Street Price: Call for Pricing

Social Media Pitch: Quarter Master® 10.4" Street Stock Clutches are built for circle track racing classes that require a stock-type, single-disc clutch
