

## Product Spotlight Video: RHS® 23° SBC Intake Manifold

**Memphis, TN** – In this video, COMP Performance Group™ VP of Engineering, Brian Reese, discusses the features and state-of-the-art engineering techniques that went into the creation of the RHS® 23° SBC Intake Manifold.

There are a lot of Small Block Chevy intake manifolds on the market, but many were designed years ago. The RHS® 23° SBC Intake Manifold stands out because it was designed to serve all of today's needs. Brian Reese tells the audience how this new manifold is built to fit all SBC heads, meaning that only one SKU is needed. He also explains how RHS® engineers optimized airflow for superior performance, plus added dual distributor hold-downs and threaded water inserts to ensure the part performs well in any application. Both EFI and carbureted versions of the manifold are available with their own features and benefits, meaning there is an RHS® 23° SBC Intake Manifold for every need.

### About RHS®

Founded in 1967, Racing Head Service® began exclusively as a manufacturer of racing cylinder heads. Over the years, RHS® grew into an integrated racing company, offering complete turn-key engines and race car parts via mail order. With innovative cylinder head designs and porting techniques, the company became a performance icon in both circle track and drag racing. RHS® is now a proud member of the COMP Performance Group™ with the industry's largest and most advanced airflow technology team that produces both aftermarket cylinder heads and engine blocks. For more information about RHS® and its products, visit us online at [www.racingheadservice.com](http://www.racingheadservice.com) or call us at 1.877.776.4323.
