### **Power Up the EcoBoost F-150 with PowerAid**

If you're looking for more part throttle response and low-end torque for the 2011-2013 Ford F-150 powered by the 3.5L EcoBoost V6, look no further than the new PowerAid Throttle Body Spacer. By AIRAID. CNC-machined from billet aluminum, the PowerAid incorporates a patented Helix bore design that places a spin on turbulent air that passes through the throttle body, providing a more organized air charge to each cylinder. This even distribution of air improves combustion efficiency, which results in improved part-throttle response as well as improvements in horsepower and torque.

The PowerAid Throttle Body Spacer easily installs between the throttle body and the intake manifold and includes all the gaskets and necessary hardware for installation. Like the rest of AIRAID's product line, the PowerAid Throttle Body Spacer is Made in the USA and backed by AIRAID's exclusive "No Hassle Warranty."

For more information on this new product or the rest of AIRAID's extensive product line, visit [www.AIRAID.com](http://www.AIRAID.com) or call 800-498-6951.
