### Quarter Master® 1.4 kW Ultra-Duty™ Starter For Idler Gear Clutchless Bellhousing Kits

**Lake Zurich, IL** – This new hand-built starter from Quarter Master® serves as a reverse-mount, standard-rotation replacement for Bert, Brinn or Falcon bellhousings using an idler gear.

Quarter Master® has poured years of racing experience and engineering know-how into its 1.4 kW Ultra-Duty™ Starter for Idler Gear Clutchless Bellhousing Kits. Designed specifically for dirt racing applications with a 65-tooth flywheel, the starter features quality components selected by racing experts to ensure no inferior imitation components are used. Each starter mounting block is also CNC-machined for a perfect fit. A race-purpose solenoid is designed to endure vibration and heat, while being able to engage in low-voltage situations. Quarter Master® installs its own pinion gear featuring a lightweight head as well; the result is much tighter tolerance in runout and makes for a very efficient flywheel engagement. Gear-reduction engineering also produces increased torque output at the ring gear. Meanwhile ball bearing construction is utilized to withstand higher engine temperatures and extreme operating conditions. Quarter Master® meticulously inspects and tunes each part before hand-assembling the starter, and every one is then tested to ensure the customer receives the utmost in performance and quality. The Quarter Master® 1.4 kW Ultra-Duty™ Starter for Idler Gear Clutchless Bellhousing Kits is blueprinted and hand-built in the USA for reliable performance race after race.

#### Quick Facts

**Product:** Quarter Master® 1.4 kW Ultra-Duty™ Starter For Idler Gear Clutchless Bellhousing Kits

**Part Number:** #114170

**Street Price:** \$307.00

**Social Media Pitch:** The Quarter Master® 1.4 kW Ultra-Duty™ Starter for Idler Gear Clutchless Bellhousing Kits is built & tested in the USA by racing experts

#### **Features & Benefits:**

- Race-purpose, super solenoid is designed to endure vibration & heat; engages in low-voltage situations
- Gear reduction creates very efficient flywheel engagement & increased torque output at the ring gear
- Ball bearing construction tolerates higher engine temperatures & extreme operation conditions
- Each starter is hand-built in the USA using top-quality components for the utmost in dependability

#### **About Quarter Master®**

Quarter Master® began operations in 1958, and since that date, Quarter Master® products have enjoyed a history of track-proven results. Quarter Master® products are built to exceed racers' demands for reliability, high-performance and durability. Our passion and our commitment are devoted to the racer's ultimate goal...winning! Quarter Master® joined the COMP Performance Group™ in early 2009 to become part of the largest family of automotive aftermarket performance manufacturers.
