### Quarter Master® Optimum-RR 7.25" Road Racing Clutch Kits

**Lake Zurich, IL** – A new line of clutch kits from Quarter Master® offers ultra-quick acceleration and deceleration with fast-and-smooth shifting characteristics.

The latest in purebred race-clutch technology has arrived. Designed to fulfill the wishes of GM LS and Ford 5.0L Coyote road racers, Optimum-RR Road Racing Clutch Kits feature a NASCAR-derived, 7.25" three-disc clutch with a fully rebuildable cover. The clutch is optimized for strength without compromising weight or moment-of-inertia. Each clutch is durable enough for standing starts, road racing and performance street applications. The clutches also utilize the latest in gear drive technology, with superior friction material that allows for quick, smooth shifts. Slotted pressure and floater plates meanwhile allow for better gas evacuation and superior cooling. The complete kit includes the Optimum-RR Clutch with button flywheel, Tri-Lite Hydraulic Release Bearing and adapter, and all necessary hardware, including clutch fasteners and replacement flywheel bolts. Corvette and Camaro racers will need to supply a factory-style flexplate, available at any GM dealership (GM Part Number: 12602448), along with the adapter for the clutch master cylinder to convert to fit a -3AN fitting. .104" race or .250" rally frictions are available.
