

COMP Cams® Melonized Distributor Gears

Memphis, TN – New distributor gears from COMP Cams® provide the universal compatibility often associated with bronze gears for use with any steel, cast iron or ductile iron camshaft, but without the wear concerns.

COMP Cams® Melonized Distributor Gears are designed to work with Big and Small Block Chevy, Ford 302 and Ford 351W applications. The melonizing nitriding process was originally developed by OEMs, including GM and Ford. As opposed to bronze gears, melonized versions are less wear-prone and feature better timing accuracy and higher strength than any other universally compatible distributor gear option. The greater wear resistance and higher precision of COMP Cams® Melonized Gears also provide less spark scatter (more accurate timing) than is possible with a bronze gear.

#410M

Quick Facts

Product: COMP Cams® Melonized Distributor Gears

Part Number: #410M (Iron .500" Shaft SBC/BBC); #431M (Steel .468" Shaft Ford 302/351W); #435M (.531" Shaft Ford 302/351W)

Street Price: \$73.03

Social Media Pitch: COMP Cams® Melonized Distributor Gears provide universal compatibility w/ any steel, cast iron or ductile iron camshaft w/out wear concerns

Features & Benefits:

- Work perfectly w/ any steel, cast iron or ductile iron cam – provide enhanced capability over bronze gears
- Less spark scatter than w/ a bronze gear due to greater wear resistance & higher precision
