New Product—Service Tools

Professionals know that there is nothing like having the right tool for the job. Crane Cams Ignition has added high quality tools to its product line to assist in your efforts to do the job correctly every time. We all have witnessed the fact that a poor electrical connection will fail at the worst possible time, but having the correct tools will help you to eliminate this problem.

Pro Internal Engine Inspection Camera
Part #1000-1140

The 2.4" color monitor allows you to visually inspect hard to reach areas. Four bright LED lights on a 40" cable with TV/video jack.

Weatherpack Pin Crimper Tool
Part #1000-1100

This tool features a ratcheting device to accurately hold and grip wire terminals from 14–20 AWG gauge size.

Weatherpack Pin Removal Tool
Part #1000-1110

This tool allows easy removal and relocation of Weatherpack style terminals from the connector housing. Fits male/female design.

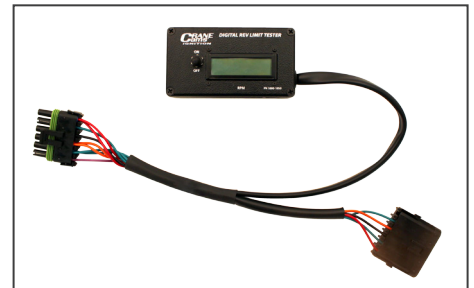

Spark Plug Wire Crimper Tool
Part #1000-1120

This tool properly strips the spark plug wire. Also crimps-on the new plug wire terminals. Includes jaw set.

Pro Digital Timing Light
Part #1000-1130

Features easy to read backlit LCD screen with four functions: tachometer up to 9,990 RPM, degrees of Advance 0–90°, dwell 0–180°, DC voltage 1–16 volts. Rotating barrel to help aim at timing mark. Can be operated with one hand.

Digital Rev Limit Ignition Tester
Part #1000-1050

Use the Weatherpack connector to easily plug into any Crane Ignition, and accurately check the rev limiter setting and tach signal. Easy to read LCD screen, with single switch operation. Also works with most other brands of ignitions.
