Quarter Master® Heavy-Duty Ring Gear For 5.5" Clutch Units Features Stronger Teeth

Lake Zurich, IL – This durable new ring gear from Quarter Master® is designed to run with locked-out full-advance ignition systems and reduce failures.

The Quarter Master® Heavy-Duty Ring Gear features a .100"-wider tooth profile than the current and standard 5.5" clutch ring gear. This wider-tooth design will minimize failures caused when engines with locked-out ignitions backfire and shear the ring gear teeth. This heavy-duty ring gear is designed from a 4140 chrome moly forging for high strength, while the stronger teeth are more resilient to engine kickback. The Heavy-Duty Ring Gear is perfect for 5.5" Quarter Master® clutches in the V-Drive, Optimum-V and Pro Series lines. It ensures proper starter alignment each and every time.

Quick Facts

Product: Quarter Master® Heavy-Duty Ring Gear for 5.5" Clutch Units
Part Number: #110018HD
Street Price: \$206.00

Social Media Pitch: The new Heavy-Duty Ring Gear from Quarter Master® features wider teeth than current options to combat failures from engine backfires

Features & Benefits:

- 4140 chrome moly forging allows for higher strength than competing options
- Ring gear tooth profile is .100" wider than current option; stronger tooth is more resilient to engine kickback

About Quarter Master®

Quarter Master® began operations in 1958, and since that date, Quarter Master® products have enjoyed a history of track-proven results. Quarter Master® products are built to exceed racers' demands for reliability, high performance and durability. Our passion and our commitment are devoted to the racer's ultimate goal...winning! Quarter Master® joined the COMP Performance Group™ in early 2009 to become part of the largest family of automotive aftermarket performance manufacturers.
