Lunati® Voodoo® Lightweight Crankshafts Are A Perfect Choice For Racers

Olive Branch, MS – The latest cranks from Lunati® to provide the utmost in weight reduction.

New Lunati Voodoo® Lightweight Crankshafts are perfect for Sprint Car, Dirt Late Model and high-winding, naturally aspirated drag racing applications. The cranks are produced from the same 4340 steel forgings as Lunati's popular original Voodoo Crankshafts, which are renowned for their durability and strength. The lightweight cranks raise the bar even higher, as they feature gun-drilled mains, pendulum-cut counterweights, lightened rod journals and a star-cut rear flange for the maximum reduction in weight and rotational inertia. The cranks are also fully heat-treated and nitrided for long-term wear resistance, while straight-shot oiling allows for optimum flow and bearing lubrication. All journal radii are ground to .125" for further increased strength. A variety of popular strokes are available for two-piece rear seal Small Block Chevs in both 350 and 400 main sizes.

VOODOO LIGHTWEIGHT CRANKSHAFTS

Application	Part #	Stroke	Main Size	Rod Size	Rod Length	Bob Weight	Weight	Price
SBC 350 Mains, 2pc RS	90132501	3.250"	2.448"	2.100"	5.700"	1710	45lbs	895.95
