

### Driven Racing Oil™ Storage Defender Fuel & Oil Additives

**Huntersville, NC** – Two new additives from Driven Racing Oil™ are designed to ensure engines have the proper protection while in storage during the winter months.

Driven offers two version of its Storage Defender additive — one formulated for fuel and one for oil. Both are for use in carbureted or EFI gasoline engines. They will save users the hassle of costly post-storage repairs resulting from the rust and corrosion that occur at an accelerated pace during the winter, due to temperature swings. Because they are specifically formulated to protect against Ethanol corrosion and induction deposits, Driven Storage Defenders and their special corrosion inhibitors work to counteract the damaging moisture buildup resulting from the hygroscopic characteristics of Ethanol-blended fuel. The alcohol-free additives also stabilize fuel and clean existing deposits in the combustion chamber. A six-ounce bottle of Storage Defender Fuel treats up to 25 gallons of gasoline, while a six-ounce bottle of Storage Defender Oil treats five to 10 quarts of oil.

**Part Numbers:** #70060 (Storage Defender Fuel 6 oz. bottle); #70052 (Storage Defender Oil 6 oz. bottle)

**Price:** \$9.99 (each)

#### About Driven Racing Oil™

Driven Racing Oil™ utilizes cutting-edge lubricant technology and on-track research for maximum performance gains from all of its product offerings. Competition drives innovation, and Joe Gibbs Racing originally developed the Driven brand of oils to advance engine and driveline performance on the racetrack. From full-synthetic race oils to engine break-in oils and cleaners, Driven offers a wide range of race and street products that deliver performance, protection and value.
