### Quarter Master® Open Bottom Steel Bellhousing Approved For Use In All IMCA Divisions

**Lake Zurich, IL** – The new Quarter Master® Open Bottom Steel Bellhousing has been officially approved for use in all IMCA divisions.

The IMCA Executive Committee has approved the newest addition to the Quarter Master® line of bellhousings, the Open Bottom Steel Bellhousing, for Modifieds, Stock Cars, Hobby Stocks, and Northern and Southern SportMods. This newest lightweight bellhousing's 3/16" spun steel, uniform construction shell with blue powder coating has been CNC-machined to tight tolerances, making installation a snap and providing increased life for the transmission, clutch splines and pilot bearings. The bottom of the bellhousing has a bolt-on cap that, when removed, allows easy inspection of the clutch and flywheel/flexplate. This open bottom design reduces overall weight without sacrificing safety or durability, and it makes installing a new transmission easier than ever. The bellhousing is finished with a blue powder coating that increases product lifespan and maintains a show-quality look. Additionally, the bellhousing works with the popular Quarter Master® Tri-Lite and Floating Hydraulic Race Bearings.

#### Quick Facts

**Product:** Quarter Master® Open Bottom Steel Bellhousing  
**Part Number:** #110441

**Social Media Pitch:** New Quarter Master® Open Bottom Steel Bellhousing has been officially approved by the IMCA Executive Committee for use in all IMCA divisions

#### **Features & Benefits:**
