

COMP Cams® Solid/Mechanical Lifters For Ford Y-Block & Flathead Applications

Memphis, TN – Push your old street rod to new limits with COMP Cams® Solid/Mechanical Lifters for Ford Y-Block and Flathead applications.

Manufactured using the tightest tolerances in the industry, the Ford Y-Block and Flathead Solid/Mechanical Lifters from COMP Cams® have exceptional strength and durability. The crowns of the lifters are precision-ground to ensure proper break-in and a longer service life. Engineered to prevent too much oil from being delivered to the top of the engine, the lifters combine modern manufacturing processes with classic valve train designs. These are not simply rebuilt lifters. They are new pieces manufactured with modern production technologies and designed to be direct replacements for hard-to-find stock parts. Both of these lifters are designed to work perfectly with the COMP® line of Classic Thumpr™ Camshafts to deliver a high performance valve train with a head turning, aggressive idle.
