

Flowmaster is proud to introduce the latest in their growing line of 409S stainless steel exhaust systems. Part number 817215 is engineered specifically for the 1998 Mustang GT and Cobra, and includes the famous Super 44 Series mufflers and mandrel-bent pipes for maximum efficiency and performance. This American Thunder kit gives the Mustang an aggressive tone inside and out, and is finished off with full-length polished 304 stainless tips. As with all Flowmaster exhaust systems, careful engineering and attention to detail mean this kit bolts right up to your factory emissions equipment, using the supplied stainless hardware, while the limited lifetime warranty ensures the quality will last.

- **Durable Stainless Steel Construction**
- **Easy Bolt-On Installation**
- **Famous Flowmaster 2-Chamber Sound**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**
