

One of the best ways to improve the performance of your vehicle is with a technologically advanced exhaust system. Flowmaster's American Thunder system for the 2001-2006 GM Suburban, Yukon XL and Avalanche increases the horsepower, torque and mileage of these popular trucks. The Flowmaster system is fully mandrel bent and consists of a flanged resonator assembly, a Super 50 Series muffler and dual 2.5-inch diameter tailpipes which exit out the side of the vehicle behind the rear tires topped off with large 4.00-inch diameter polished 304 stainless tips. All necessary parts and hardware are included for a great fitting installation. As an American Thunder system, it will typically produce a moderate interior and exterior sound level. The specially designed resonator assembly is tuned to reduce the interior sound level for a more comfortable experience inside the vehicle. Constructed in durable 409S stainless steel, the system is covered by Flowmaster's Limited Lifetime warranty.

- **Stainless Steel Construction**
- **Great Flowmaster Sound**
- **Easy At-Home Installation**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**

**409S<sup>®</sup> Stainless Steel****SPECIFICATIONS:**

UPC: 700042-02489-6

**BOX DIMENSIONS:**

11.75" H x 16.50" W x 62.25" L

**WEIGHT:**

64 lbs.

**Part# 817342**
