

NEW PRODUCT RELEASE

Flowmaster's Force II Cat-Back System for 1999-2004 Ford F250 and F350 trucks with V8 or V10 engine is the perfect way to increase power, torque and mileage for these extremely popular pick ups. Manufactured using durable 409S stainless steel, the Flowmaster Force II system features a clamp-on 3.00-inch inlet pipe that runs through a 70 Series single in/single out muffler and exits through a 3.00-inch mandrel bent tailpipe that exits out the right side behind the rear tire. The system is finished off with a large 3.50-inch diameter polished stainless steel Flowmaster tip. This high tech Force II system provides improved horsepower, mileage and torque along with a deep, moderate tone on the outside and a mild sound level inside the cab. Instructions and all the necessary hardware are included with the system for an easy bolt-on installation that can be handled by the do-it-yourselfer.

- **Made in the USA**
- **Lifetime Warranty**
- **Mild Interior Sound Level.**
- **Improves Torque, Horsepower and Throttle Response.**
- **409S Stainless Steel Construction for Maximum Durability.**
