

Flowmaster and trucks just seem to go together. That's why Flowmaster's Force II system for 09-11 Ford F150 trucks with 4.6L and 5.4L V8 engines, in all cab/bed configurations makes for a perfect partnership delivering increased power, torque and mileage. This fully mandrel bent system consists of a flanged 3.00-inch inlet pipe that connects to the back of the catalytic converter pipe and serves as a mount for the Flowmaster Super 50 Series muffler and a single 3.00-inch tailpipe that exits behind the rear tire. The system also features a 3.50-inch diameter polished 304 stainless tip with embossed Flowmaster logo. All the necessary parts and hardware are included for a great fitting installation that can easily be handled by the do-it-yourselfer. As a Force II system, it will typically produce a moderate exterior sound level while maintaining a mild tone inside the vehicle. Constructed in durable 409S stainless steel, this high quality system is covered by Flowmaster's Limited Lifetime warranty.
