

Flowmaster is excited to introduce another addition to our expanding line of stainless steel exhaust systems. This new system, specifically engineered for the 1999–2004 V6 powered Mustangs, provides the best possible performance benefits along with a moderate sound level outside and a mild interior tone. The system is a true bolt-on kit that includes a Scavenger Y-pipe assembly featuring a pair of the legendary Super 40 Series mufflers and a pair of 2.5" mandrel-bent tailpipes. Polished T304 stainless tips finish the system off and give the V6 car the performance look of a GT. Also included are detailed instructions and all the necessary hardware for an easy at-home installation. Proudly made in the USA, this 409S stainless exhaust system like all Flowmaster stainless products carries our limited lifetime warranty.

- **Durable Stainless Steel Construction**
- **Easy Bolt-On Installation**
- **Famous Flowmaster 2-Chamber Sound**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**
